

Box Scraper

The **3PH Box Scraper** by MK Martin provides the small and large property owner with affordable options for grading with their line of box scrapers. Complete with steel cutting edges, height adjustable shanks, and a fully welded 3PH design these Box Scrapers really deliver.

The MK Box Scraper features two steel cutting edges. One located on the inside of the box and one on the outside. These two reversible hardened steel cutting edges allow the operator to pull or push material.

Grader Leveler

This two in one combination of leveling and scraping makes short work of your grading jobs. The first blade attacks the high spots cutting them down to size, the second blade further scrapes anything the first missed and fills in the hollows. With two blades cutting and filling it takes much less time and fewer passes to achieve the even distribution of material you are looking for.

The scraper can be 3PH mounted, or the skidsteer Quicktach adapter plate puts the work in front of you.

With two half inch reversible hardened cutting edges material is quickly leveled or redistributed to fill low points as the unit passes.
