1000 RPM GEARBOX KIT

All models with "F" in the name come standard with the 1000 RPM Gearbox Kit.

The 1000 RPM Kit also raises the input shaft to allow the PTO shaft to run at a lesser angle on larger tractors increasing the efficiency and life of the driveline components. The reduction box allows you to reverse the rotation so you can mount a regular snow blower to the front of a tractor.
PTO shaft not included.

MK Martin has completely redesigned the Pull Type Tractor Snowblower. Most notably with the redesign, the new Pull Type blower now cleans tight to the garage door, with no need for an additional back drag system. Connecting to your tractor's 3PH, the inverted snowblower allows you to drive straight forward pulling the blower instead of backing into the snow. Easier on your neck, the pull type blower is ideal for quickly clearing driveways and laneways.

TIVAR WEAR PARTS

Tivar is a wear resistant plastic that replaces steel cutting edges and bolts onto the skid shoes.

Optional on Pull Type models, the tivar is gentler when clearing, ideal for interlocking brick and decorative stone.

Self Powered Snow Throwers

FEATURES

For tractors and compact skid loaders without hydraulic remotes, MK Martin offers our self powered snow thrower.

While being easy to attach with no drive lines or hoses to worry about, the engine belt drives the shaft which transfers power to the rotor by a roller chain.

These self powered snow throwers are ideal for moving snow quickly with precision in mind. The flared body opening helps to cut snow and direct to the efficient rotor assembly.

Extreme Duty Brush Cutters

DIRECT MOUNTED MOTOR

The hydraulic radial piston direct mounted motor and heavy duty bearing assembly deliver tip speeds of up to 20,000 ft. per minute and produce powerful torque at lower speeds for continuous cutting and faster recovery.

HEAVY DUTY 10" CUT CAPACITY

Easily power through dense brush, woody vegetation even 10 inch diameter trees across fields, forests and trails.

4 REPLACEABLE FLAIL KNIVES

Mounted on the rotor are 4 replaceable pivoting flail knives designed to deliver maximum centrifugal velocity and shear force on every rotation.

(A)

(B)

REVERSIBLE FRONT PUSH BAR

One side (A) has aggressive teeth for accurate pushing and directional control of larger trees. The reverse side (B) is smooth, intended for flattening dense underbrush.

HEAVY DUTY 1" THICK ROTOR

78" diameter oversized rotor is manufactured using a 1" thick steel plate.
