TRACK CURRY

This easy to use tool will allow you to condition indoor or outdoor track surfaces that have been packed or compressed by heavy traffic or natural elements such as heavy rains, to restore your riding surfaces in a single pass.

The **Track Curry** uses a three step process that begins with two rows of heavy duty S-tines to fracture compacted track beds by cultivating the ground. Followed by an adjustable leveling bar to redistribute and smooth out the freshly cultivated materials. An adjustable 12" rolling drum finishes the job by packing the surface to the ideal density and applying a subtle texture.

The MK Martin **Track Curry** will condition your arena or track to the footing most suited to the health and safety of your horses.

Model	TC-5	TC-6	TC-7	TC-8
Working Width	5'	6'	7'	8'
Number of Shanks	13	15	17	19
Shank Size	1-1/4" x 3/8" x 22"			
Shank Clearance	16"	16"	16"	16"
3PH Mount	CAT. 1	CAT. 1	CAT. 1	CAT. 1
HP Rating	18 - 32	22 - 39	26 - 47	30 - 53
Weight (LBS.)	460	530	640	725
Leveling Bar	1/2" x 6" (double beveled)			
Sacrifier Bar (Optional) Number of rippers	4	5	6	7
Sprinkler System (Optional)	25 Gallon tank with 3 spray nozzles			

Heavy Duty S Tines

The two rows of S-tines work to loosen the material in your riding arena bringing the lower layer material to the top as they pull through ground. The S-tines are equipped with replaceable tips for easy maintenance and optimum performance.

Adjustable Leveling Bar

The double beveled leveling bar cuts the peaks and fills the valleys across the arena surface without packing it. The adjustable height allows operators to make fine adjustment to the material thickness increasing or decreasing cushioning.

Spill Plates

Every MK Martin Track Curry comes with two standard spill plates. These funnel any excess material into the Track Curry's path, ensuring your arena or track keeps looking its best.

12" Rolling Drum

Designed to provide your horses with sure footed confidence, the 12" Rolling Drum breaks the surface of the material leaving behind a consistent pattern without causing further compaction.

Wing (Optional)

The optional Track Curry wing from MK Martin easily levels the edge of the riding arena for a clean and professional look.

Scarifier Bar (Optional)

Dig deeper with the optional scarifier bar. Each bar is individually height adjustable, or can be removed or inverted for the right amount of action.

Sprinkler Kit (Optional)

Equipped with a 25 gallon tank, the optional sprinkler kit reduces the amount of dust being thrown into the air when working with dry material.

MK Martin **Cultivators** are the ideal tool to be used in small fields and gardens. Equipped with two rows of S-tines this cultivator provides thorough penetration aerating the soil and preparing seedbeds. Each tine features easy single bolt adjustment allowing you to adjust your soil distribution as required. Each S-tine also features replaceable bolt-on tips allowing for easy individual replacement as needed.
